Registered Nurse Onboarding
Medication Safety

National League for Nursing
Basic Proficiency in Medication Administration
For RN and LPNs Assessment

You have been scheduled to complete the NLN Basic Proficiency in Medication Administration Assessment

- All Experienced and Newly Licensed RN and LPNs will take the Adult version of the assessment.

- This nationally validated and reliable testing tool measures the knowledge and abilities necessary for registered nurses to safely administer medications to a general adult population.

- The test is computer based, 60 multiple-choice questions, with a 75 minute time allowance. The test includes three categories of questions:
  - Calculations
  - Principles of Medication Administration
  - Drug Effects

- Three subset scores and an overall score are provided to the test taker upon completion of the assessment.
• An overall score of 80% is required for successful completion of the assessment and prior to administering medications to patients.

• If an overall score of 80% is not attained, opportunity to retake the assessment will be provided.

• Calculators may be utilized during the assessment.

To prepare for assessment the following PDF link is helpful
