Continuing Dental Education Program presents

featuring
Dr. Charles Wakefield

Wednesday, April 3, 2013
7:45am - 3:30pm

***NEW VENUE***
Mack Auditorium
2100 Mack Boulevard
Allentown, PA 18105

This lecture will review the confusing array of current restorative materials and the rationale for selection and clinical use of the most appropriate material in varying clinical situations. The confusion between marketing and evidence based dentistry will be made clear. The application of color in dentistry, principles of smile design and clinical restoration of cosmetic cases for the general dentist will be described and illustrated. An update in bisphosphonate therapy and osteonecrosis of the jaws will be presented as a matter of current interest.

In this session, attendees will learn about:

- Selection of adhesive systems, including self-etch products
- Microfill, hybrid and nanofilled composites
- Light Curing techniques and products
- Glass ionomers, resin modified glass ionomers and compomers as liners, luting agents and restoratives
- Bleaching
- Direct pulp capping with calcium hydroxide or adhesive agents
- Esthetic alternatives such as indirect composite, porcelain inlay/onlays/crowns and their clinical techniques.
