

Health Center at Trexlertown

At the Health Center at Trexlertown you can see doctors in women's health, pediatrics, podiatry, rheumatology and family medicine in one convenient location. You can receive specialized care for diabetes and Down Syndrome. HealthWorks, our occupational medicine program, is also on site to help area businesses keep their employees healthy.

The center also provides blood-testing services, X-rays, mammograms and physical therapy. In addition, we offer specialized health programs and even massage services. Plus...you can access all these services and still get some shopping done. We're located in The Shoppes at Trexlertown next to Kohl's.
